FastTest

Comprehensive Test & Inspection software you can rely on

Produce a quality certificate in two easy steps...

Step One

Collect data on site

- Collect data using a laptop, either stand alone or connected via the Multi-User Network Ready option
- Collect data manually

Process the data through FastTest

- Enter your data onto the PC
- Validate your data to check for errors

Step Two

Print out professional certificates

- Print certificates directly onto plain paper or pre-printed NICEIC stationery
- Save certificates as PDF files and email direct to your clients
- Print on site using either a laptop or FastTest Mobile uploaded on to a Pocket PC along with a portable printer

Produce professional certificates any way you like...

Directly on to plain paper or NICEIC Stationery!

For a full list of certificates [click here](#)

FastTest delivers a complete, professional certification package that is quick and easy to use and allows you to print quality certificates onto plain paper.

- Endorsed by the NICEIC for complete confidence and peace of mind*
- Print on plain paper – no need to buy pre-printed certificates or certificate numbers
- Designed specifically for electrical engineers - FastTest is packed with essential time saving features
- Store and locate all of your client details and certificates instantly – more than just form filling
- Comprehensive range of certificates including BS 5839:2004, BS 5266:2005 and BS 7671:2008 that meet Part P requirements
- Automatic inspection reminder – ideal for periodic work
- Customise your certificates – utilise governing body logos, signatures, company logos and customisable colours
- Includes powerful wizards and templates to save you time
- Network Database ideal for organisations with multiple engineers - available with FastTest Pro

*Endorsed by the NICEIC for printing on their 17th Edition computer friendly stationery.

Interested...?

The FastTest range is available at different levels to suit your needs!

Why not call us today to find out how FastTest can save you time and money!

Making smart use of technologies such as FastTest helps us to maintain high levels of service to clients across a wide range of projects. With prestigious clients such as Marks & Spencer, Sainsbury's and HM Prisons, the quality and consistency of our service is a number one priority.

FastTest takes care of a lot of the routine work and has dramatically reduced the amount of paper we have to handle. This enables us to respond to customers' needs faster and more efficiently.

Daryl Fortune | Operations Director, Longcross Mechanical & Electrical Contractor

AMTECH Office

Four powerful packages... one fantastic suite!

A comprehensive collection of market leading software programs that will help you increase efficiency, boost productivity and deliver healthier margins.

With AMTECH Office, not only will you increase your competitive advantage – you also SAVE UP TO 50% compared to buying each item separately.

ProDesign

Design and verification to BS 7671

This powerful, engineer friendly software is ideal for projects of all sizes. ProDesign's many design options provide total control from initial design through commissioning, right up to the final competition.

- Fast, accurate and design calculations – calculate cable sizes, volt drops, fault levels and system impedances
- Produce professional, high quality and accurate reports
- Packed with useful features to save you time and money
- Easy to use, sketch a single line diagram in minutes
- Save reports and schematics as PDF files and email to your clients
- Export data in Excel & HTML format
- Export data to FastTest for producing all certification
- Powerful integration between design and co-ordination
- Import and export projects with Protect for quick discrimination studies and device settings
- ProDesign allows you to verify that new and existing sites comply with the Electricity at Work Regulations

FastTest

Test & Inspection software

Produce professional Test & Inspection certificates fast. Print certificates onto plain paper and pre-printed NICEIC stationery.

- Compliant with BS 7671, BS 5839-6 & Part P
- Save certificates as PDF files and email directly to your client
- Extensive database facility – store client details, test results, inspection details and certificates
- Powerful import feature - create Test & Inspection reports by importing data from ProDesign with no need to re-enter data, allowing you to save time and reduce mistakes
- Automatic inspection reminder – ideal for periodic work

We are quality assured and need to be able to prove that we work to standards. It is comforting to know we can produce comprehensive documentation and calculations on every job we do, large or small. We can use the most economic cables for the job and still be confident that we meet all the safety requirements.

We particularly like the integration between ProDesign, Protect and FastTest, it saves a lot of time and there is no other package available with these features.

SingleCable

Quick single cable calculations to BS 7671

Whatever type of circuit, whether a mains feeder or a final circuit, you can size the cable accurately in seconds and produce detailed reports.

- Calculate any cable in seconds
- Helps ensure you comply with current standards
- Instant on screen results
- Contains full database of cables and protective devices
- Choice of reports for any cable
- Comprehensive calculations to BS 7671

AMTECH Office

- ProDesign4 (4 board capacity)
- Protect LV
- FastTest
- SingleCable

AMTECH Office Plus

- ProDesign13 (13 board capacity)
- Protect LV
- FastTest Plus
- SingleCable

AMTECH Office Pro

- ProDesign25 (25 board capacity)
- Protect LV
- FastTest Pro
- SingleCable Pro

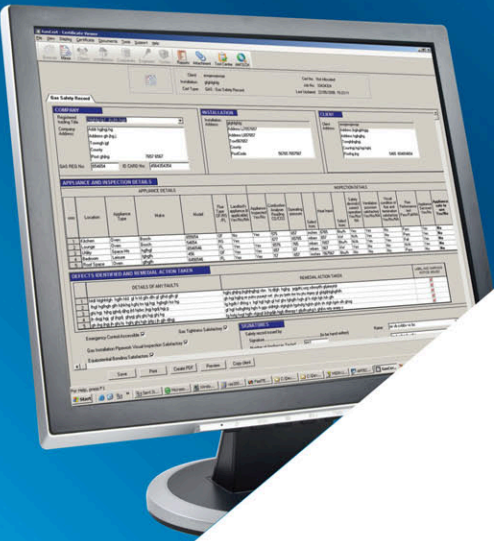

Protect LV

Protection co-ordination made easy

Protection can be a grey area for many contractors and engineers. This easy to use software allows you to confirm that the protective devices will function when required to do so.

- Produce and calculate your designs in ProDesign then export direct to Protect to check overload discrimination and device settings
- Helps you prevent nuisance tripping on your new projects
- Helps you assess whether devices will correctly trip under over current and earth fault conditions
- Extends the services you can offer to your client
- You don't need to be a co-ordination expert to use Protect

GasCert contains these certificates

- Landlord / Home Owner Gas Safety Record
- Gas Warning Advice Notice
- Minor Electrical Works Certificate

Produce a quality certificate in two easy steps...

Step One

Collect data on site

- Collect data using a lap to save time
- Collect data manually

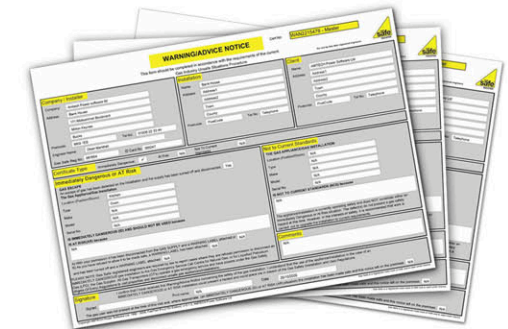

Process data through GasCert

- Data already input to laptop
- Enter your data onto the PC

Step Two
